## Project Title: Pokémon

This website will condense the 9 Pokémon generations through multiple pages, easily navigable using a navigation bar. I would like this website to highlight each generation communicated through narratives of what makes them unique from one another. Since Pokémon has an extensive timeline, there is a lot of room to include content and images!

- **Home Page/Introduction** — Introduce what Pokémon is; include basic information about the games, animation series, and trading cards
  - Include information about Pokémon elements
  - Include information about Pokémon evolutions
- **Generations I – IX** — Provide detailed information based on each generation including the name of the generation, Pokémons included, starter Pokémons, key characters (gym leaders, professors, default trainers, etc.), towns/villages/cities, and other information that is pertinent to include.
- **Sources** — Credit resources, Wikipedia page, and images used
